## Roofwash

**An aqueous solution in concentrated form, for use as a cleaner to remove moss, mould and lichen from roofs, walls and paths.**

### Specification

Appearance @ 20 C	clear pale liquid
% active content w/w	50.0 - 52.0
% free amine	1.0 max
pH 10% solution	6.5 – 8.5

### Typical Properties

S.G @ 20 C	0.98
Boiling Point	100 C
Flashpoint	not flammable

### Application

Specifically formulated to give reduced foaming for use in applications where foam generation can cause problems such as during pumping, spraying, bottle filling etc.

Highly efficient broad spectrum, quaternary germicide with major applications in the field of disinfectants and sanitisers. It has additional specialized industrial applications as an emulsifier and in the textile industry.

Excellent for use as a cleaner, to remove moss, mould and lichen from roofs, walls and paths.

Can be diluted in a ratio up to 1 : 50 with water.

**Ensure water tanks are disconnected, and wait three good rainfalls for roof to wash down before re connecting tanks. Be careful to protect plants and foliage.**
